If wanting Wings one may ascend the Skies.
And Phœbus view, without an Eagle's Eyes,
Then Rouse up (Muse) from thy Lethargick strains
And (having first invok'd the God of Brains)
Let the Grand Subject of thy Measures be,
No Soul to England like a MONARCHY.

The People, or the Nobles to debate
The deep concernment of a Troubled State,
Set Times and Places have assign'd them: They
First Meet, and then adjourn from Day to Day.
Whereas a Monarch, who by Nature's One,
Deliberates always, never's off his Throne.

An Astrologo-Physicial Discourse.

That the pre-dominion of humours, is the immediate cause of diseases; and that the excitation of these humors, is caused by the various and different Aspects and Positions of the Stars, even by Hippocrates and Galen themselves confirmed. Trust we then to these Rules Astrological, to be observed for the advantage for the sick;

Let the { Sanguine, Cholerick, Phlegmatick, Melancholy } bleed the ☽ being in { ♈, or ♓. ♑, or ♐; ♉, or ♍; ♎, ♏, or ♐. }

But let her be also in the Aspect of the Fortunate Planets, and seated in a fortunate part of Heaven.

It is good to purge with Electuaries, when the ☽ is in ♋; with Pills, when she is in ♐; with Potions, when in ♍, because then posited as before directed.

Vomits are unsafe for all sorts of complexions and constitutions; yet sometimes there is a necessity for them; as when the Distemper lyeth above the stomach; it being impossible for a Purge, or any purgative Medicine thence to carry it; but when there is an occasion they may be safely taken when the ☽ is in ♉, ♍, or ♑, in any good Aspect of ♀, ♃, or ☉.

Glysters are most conveniently administred, when the ☽ is in ♈, ♎, or ♍, posited as before.

Good to stop Fluxes, or Rheumes, or Issues, when the ☽ is in any of the Earthly Signs, viz. ♉, ♍, or ♑; of which experience is a valuable witness.

Very proper to Bath, when the ☽ is in ♋, ♏, ♎, or ♓, in Aspect of ♀, or ♃.

Convenient to cut Hair, the ☽ being in ♏, ♑, ♎, or ♓, increasing in Light. And although this be in the opinion of many but a Trivial thing to observe; yet were it more taken notice of by the Gallants of our times, they need not disguise themselves with Venus Locks; But they, it may be, esteem it an Honour to be made amends with a part of her, that Originally injured them.

Medicina a medico; medela ab altissimo.

An

Of the ſeveral Seaſons of this Year 1686.

1. *Of the* SPRING.

THE *Spring*, the moſt beautiful Seaſon of the whole Year, always begins when the *Sun* toucheth the firſt *Scruple* of *Aries*, firſt and chief Sign of the *Zodiack*; There, making Days and Nights Equal to all the World at once: Running on like a *Gyant* his Courſe, increaſing the Days, and ſhortning the Shadow all the time he paſſes through *Aries*, *Taurus* and *Gemini*; At the End whereof he concludes this *Vernal Quarter*, the days, as the growth of Vegetables, ſeeming then to have attain'd their Tropique height and perfection. This pleaſant *Quarter* begins this Year, 1686. on *March* the ninth day, at 13 h. 48 *min. Poſt Meridiem*, or Afternoon, and the Figure thereof is as followes.

Aſtrologers from the Vernal Figure, teach us to Raiſe Judgements upon the Actions of the World ſo long as ſuch Figure ſhall laſt; which if the Horoſcope thereof

thereof be Fixed, 'twill continue the whole Year; if moveable, but one quarter of a Year; if Bycorporeal, as there, then it will be regnant half a year only. And for that the Vernal Figure hath a Bycorporeal Sign for its Horoscope, it will only assist our Judgments for half this Year, *viz.* until *September* the twelfth, at which time the Sun enters *Libra*.

In this Scheam I cannot discover any thing very prejudicial or menacing, but rather the contrary, for the Sun is in platique *Trine* of *Jupiter*, as well as in platique *Opposition* of *Saturn* and *Venus*, Governess of the Mid-Heaven, is the strongest Planet in the whole Heavens, which plainly signifies that the Governour and Government of this great Nation, will get Ground against all its and their Opposers; Also that the King and his Lawes will be Obeyed, and bowed to, though with much murmuring and grumbling among a discontented sort of people, who are willing to be Fishing in troubled waters as far as they dare and can, with any shew of Safety.

The Melancholy planet *Saturn*, Retrograde in the 9th. Angle, in *Sextile* of *Jupiter* Lord of the Horoscope; in *Scorpio*, Retrograde also; Shews that the Vulgar people will be much addicted to Dreams, prophecyes, Visions, Revelations, *&c.* and generally please themselves with such imaginations and Melancholy Humours. And while people keep themselves within due bounds and obedience to the Lawes, they receive protection from them; I conceive there can be no harm in such opinions, the danger is in misapplying them.

I will not say, that all things which are said to be Prophecyes, are really so; yet I cannot but conclude, that

that the Spirit of prophecy is attendant upon the World in all Ages, though at ſometimes more or leſs viſible or veritable, then at others: And that Men of a well-poyſed *Melancholy*, *viz.* of a Sober, Juſt, Pious and Contemplative Life, (for Truth is moſt, and eaſieſt to be found in the ſtill Voice) may certainly have a Pre-viſion of Future things; which not only Aſtrologers, but even Divines do generally acknowledge. For the more Holy and Divine the Life of any Man is, the greater portion of profitable Truth will he be Endued withall. And it hath been upon Holy Auſterities, and a relinquiſhing of all Worldly Troubles, Cares, Perturbations and Incumbrances, that ſome Men have been inſpired, or illuminated to predict ſuch things, that the common Rules of Art cannnot reach or attain unto: Deductions from Science being more Mathematical, or Logical, then Prophetical, and are no more then ordinary attainments or acquiſitions, as one Man may impart to another, as one Candle yieldeth Light to another, and loſeth not its own. But to Predict particular Future things, *None* (ſaith *Ptolemy*) *can do that from Art alone*, but (as he ſayes) *a re, & a Scientia, &c.* From himſelf and his Science together, being born with a Spirit or Genious, (as Heaven hath been pleaſed to permit) and under Stars of Suitable influences for ſuch Noble purpoſes.

Thus *Spurina*, *Noſtradamus*, the *Monk* in *Henry* VIIth. time, *Merlyn*, and many others, being Endued with a Prophetique Soul have foretold ſome things (to common apprehenſion) little leſs then miraculous. But we haſten to the Sun in *Libra*.

II. Of the AUTUMN.

The Autumnal Quarter begins, when the *Æstival* or Summer Seaſon ends, *viz.* when the Sun enters the Equinoctial Sign *Libra*, which this year is at the time mention'd in the Figure. At this time the days and Nights are Equal as in the Spring; But this difference attends the two Seaſons, *viz.* In the Spring, the dayes increaſe to us, but at this time the Nights enlarge themſelves; And as the Spring Seaſon brings along with it more of the Sun, this Autumnal Seaſon deprives us of that great Bleſſing, and Subjects us to the greater portion of Shadow.

This Quarter continues all the time the Sun paſſes between the firſt ſcruple of *Libra*, and the firſt ſcruple of *Capricorn*, paſſing thorow the Signs of *Libra*, *Scorpio*, and *Sagittarius*.

I ſhall but lightly touch upon the Aſtrological Judge-

ments

ments belonging to the Scheam. (1.) All the Planets under the Earth (*præter Lunam*) dencte many ſecrets, but the Moon is in Sextile of the Sun, deeds of darkneſs will be brought to Light, when the Authors of them leaſt ſuſpect it, and the Enemies to peace and quiet will be rewarded according to their demerits, (2) As *Saturn* was in the 9th Angle at the Vernal Ingreſs, ſo here he is Lord of the ninth, and in *Sextile* of the Moon, Combuſt, and beſieged of the Sun and *Mercury*, all which enforce the Melancholy and Enthuſiaſm mention'd in the Vernal Figure; With this difference, that here in this latter part of the Year, the Melancholy ruling ſeems more aduſt. (3) As the Moon is in the 7th. Angle with the *Dragons Tail* near *Cor Scorpii*, a violent fixed Star, carrying the Light of the Sun and *Saturn* to *Mars* by an unhappy Quadrate aſpect, ſo here is to be feared many Duels, *&c.* And ſhews that Courts of Juſtice will be troubled with variety of Offenders. But thus much ſhall ſerve for this Figure.

III. Of the Summer Seaſon.

I muſt not forget to mention the Summer Seaſon, though ſomewhat out of place, which alwayes begins where the Spring Ends, *viz.* When the Sun toucheth the firſt Scruple of the Tropical ſign *Cancer*, then making longeſt days and ſhorteſt Nights to us on this ſide the *Equator*: This Quarter continues all the time the Sun paſſes thorow the ſigns *Cancer*, *Leo*, *Virgo*; And as he perambulates in them, the days do gradually decreaſe, and the Nights grow longer and longer —— the Judgements Aſtrological belonging to this Seaſon are included in thoſe of the Spring. And therefore I ſhall ſay no more thereof.

IV. Of

IV. Of the Winter Quarter.

The Winter Quarter begins alwayes where the *Autumnal* Ends, *viz.* At the time when the Sun toucheth the firſt point of *Capricorn*, and continueth all the time the Sun tranſiteth the three Signs of *Capricorn*, *Aquarius*, and *Piſces*. The days are now at the ſhorteſt, and the Nights at their greateſt length, we having now leaſt portion of Sun-ſhine, and greateſt quantity of Shadow. The Sun is now in his *Perigæon*, or neareſt diſtance to the Earth, as being removed fartheſt from his *Apogæon* Chair of Honor, I mean the Summer Solſtice. As he paſſes from the beginning of *Capricorn*, ſo by degrees the days increaſe, and when having arrived at the end of *Piſces*, prepares us for the Entertainment of the Gloryes of a New Year, by the vigour of an approaching happy Spring. Thus much for the four Quarters of the Year.

Of the Eclipſes which happen 1686.

There will be four Eclipſes in this Year, 1686. two of the Sun, and two of the Moon, which will follow thus.

The firſt will be of the Sun on *May* the 12th. day, about our 7 of the Clock in the Morning, but not to be ſeen by us. It is Celebrated in the beginning of *Gemini*, and is of very Active ſignification to them it concerns.

The Second will be a Lunar Eclipſe on *May* 27. about 11 of the Clock before Noon; And therefore alſo invi-ſible as to us, but will be viſible to our *Antipodes*. It is made in 16 degrees of *Gemini*, and of as brisk ſignifica-tion as the former.
